

Neousys Ruggedized Wide-temp Edge AI Platform

Flexible and powerful GPU-aided computing for advanced applications

Industrial-grade Edge AI Platforms for Critical Industrial AI Applications

With the emergence of the Artificial Intelligence (AI) technology, GPU-aided edge computing platforms are critical in many advanced applications. As GPUs are naturally great at parallel workloads, they can accelerate the AI learning process dramatically.

Neosys' GPU computing edge AI platform - GC series are designed to deliver tremendous GPU power in harsh conditions. The rugged, scalable and easy-to-deploy computing platform supports various GPU graphics cards and can benefit the development/ implementation of related advanced applications.

Combining industrial-grade power, thermal and mechanical design with exceptional CPU and GPU performances, Neosys' GC series push versatile AI applications from laboratories to field applications, where reliability matters.

Neosys Rugged DNA

Thermal design for wide-temp

The system is designed to accommodate graphics cards and operate in wide temperatures ranging from -25°C and up to 60° (* R.O.C Patent No. M534371). The patent reinforces the Neosys GC series mechanical design is of quality and unparalleled reliability that can withstand rugged and harsh industrial environment conditions.

Vibration and shockproof

Neosys GC series comes with patented damping brackets (*R.O.C Patent No. M491752) and it can withstand up to 3 Grms to protect the system against vibration when deployed in an in-vehicle environment. Most GC series systems are also compliant with the MIL-STD-810G standard.

Reliable power design

The power delivery design of Neosys GC series supports from 8V up to 48V wide-range DC input and is capable of handling up to dual 250W graphics cards power consumption for edge AI applications.

Neosys' GC Series for GPU-accelerated Edge Computing

To fulfill versatile AI applications, Neosys offers rugged edge AI platforms that are designed specifically to support 120W, 250W NVIDIA® graphics cards and NVIDIA® Tesla T4 in single/ dual configurations. Along with Neosys Cassette design and MezIO™ interface for function expansion, ignition power control for in-vehicle usage, the Neosys' GC series is an ideal platform for data-intensive tasks.

GC series with a wide range of industrial AI applications

Nuvo-7164GC/ Nuvo-7166GC

Ruggedized AI Inference Platform Supporting **NVIDIA® Tesla T4** and Intel® 9th/ 8th-Gen Core™ Processor

- Supports NVIDIA® Tesla T4 GPU
- One additional PCIe x16 slot for add-on card (Nuvo-7166GC only)
- Dedicated heat dissipation for -25°C to 60°C wide-temperature operation
- Intel® 9th/ 8th-Gen Core™ hexa-core 35W/ 65W LGA1151 CPU
- 6x GigE ports, 802.3at PoE+ option available (ports 3~6)
- M.2 2280 M key NVMe (Gen3 x4) socket for fast storage access
- 4x USB 3.1 Gen2 ports and 4x USB 3.1 Gen1 ports
- Accommodates two 2.5" SATA HDD/SSD with RAID 0/1 support
- MezIO™ interface for easy function expansion

Nuvo-7166GC/ 7164GC is Neusys' ruggedized AI inference platform specifically designed for NVIDIA® Tesla T4 and supports Intel® 9th/8th-Gen Core™ processor. Utilizing Neusys' patented Cassette module, Nuvo-7166GC/ 7164GC provides optimized cooling solution for Tesla T4 to ensure reliable and stable system operation in harsh environments.

Supports NVIDIA® Tesla T4

Dedicated for Tesla T4, Nuvo-7166GC/ 7164GC provide 8.1 TFLOPS in FP32 and 130 TOPs in INT8 for real-time inference based on trained neural network model.

Fast storage access and plenty I/O

Nuvo-7166GC/ 7164GC/ 7160GC features USB 3.1 Gen2/ GbE/ PoE ports for data/ image acquisition and an M.2 NVMe interface for ultra-fast disk access.

Powerful expansion capability

Supports one additional PCIe x16 slot for add-on card (Nuvo-7166GC only) and Neusys' proprietary MezIO™ interface for easy function expansion (Nuvo-7166GC/ 7164GC/ 7160GC).

Air tunnel design for Tesla T4 & add-on card

Neusys' patented Cassette & air tunnel design guides intake air through the passive heat sink of NVIDIA® Tesla T4.

Nuvo-7160GC Series

Ruggedized GPU-Computing Platform Supporting **120W NVIDIA® GPU** and Intel® 9th/ 8th-Gen Core™ Processor

- Supports NVIDIA® GPU with up to 120W TDP
- Patented thermal design to allow -25°C to 60°C wide-temperature operation
- Intel® 9th/ 8th-Gen Core™ hexa-core 35W/ 65W LGA1151 CPU
- 6x GigE ports, supporting 9.5 KB jumbo frame
- M.2 2280 M key NVMe (Gen3 x4) socket for fast storage access
- 4x USB 3.1 Gen2 ports and 4x USB 3.1 Gen1 ports
- Accommodates 2x 2.5" SATA HDD/ SSD with RAID 0/ 1 support
- Compatible with MezIO™ interface for function expansion
- Patented ventilation design for graphics card

Nuvo-7160GC is a ruggedized GPU-aided edge computing platform designed for modern machine learning applications such as autonomous driving, facial recognition and machine vision. It supports up to a 120W GPU, delivering 4~6 TFLOPS computing power for inference, as well as Intel® 9th/ 8th-Gen Coffee Lake Core™ 8/ 6-core CPU, offering up to 50% CPU performance enhancement over previous generations.

Autonomous public transport

- Patented thermal ventilation design and damping bracket for reliable operation
- Optional ignition control and wide-range DC input (8~35V) for in-vehicle deployment

AI Inference

Machine vision and object inspection

- Supports PoE/ USB3.1 camera interfaces
- Supports optional frame grabbers for deep learning-based vision applications
- AI inference computing for imagery recognition and analysis

Nuvo-8108GC Series

Industrial-grade Edge AI Platform Supporting 250W NVIDIA® Graphics Card, Intel® Xeon® E or 9th/ 8th-Gen Core™ Processor

- Supports 250W NVIDIA® graphics card up to 14 TFLOPS in FP32
- Supports Intel® Xeon® E or 9th/ 8th-Gen Core™ i7/ i5 LGA1151 CPU
- Up to 128GB ECC/ non-ECC DDR4 2133 (4x SODIMM)
- One x16 (8-lanes), two x8 (4-lanes), Gen3 PCIe slots for add-on cards
- 1x M.2 M key, 1x M.2 B key and 2x full-size mini-PCIe sockets
- 8~48V wide-range DC input with built-in ignition power control
- Patented thermal design for -25°C to 60°C rugged operation
- Patented damping brackets* to withstand 3 Grms vibration

Nuvo-8108GC is a rugged edge AI platform with industrial-grade design and in-vehicle features. Designed specifically to support a high-end 250W NVIDIA® graphics card, it offers tremendous GPU power up to 14 TFLOPS in FP32 for emerging GPU-accelerated edge computing, such as autonomous driving, vision inspection and surveillance/ security.

Supports 8~48V DC input

The system supports 8~48V wide-range DC input with built-in ignition power control. It's feasible to deploy it on a vehicle and directly power it via the car's electrical power system.

Patented thermal design

The system can truly operate under 100% loading without CPU and GPU throttling up to 60°C.

Withstand 3Grms vibration

With the patented damping bracket design to absorb vibration, the system delivers extreme reliability with high performance when it is installed in a vehicle.

Deep Learning/ Machine Learning

Nuvo-8208GC Series

Ruggedized GPU Computing Edge AI Platform Supporting Dual 250W NVIDIA® Graphics Cards, Intel® Xeon® E or 9th/ 8th-Gen Core™ Processor

- Supports dual 250W NVIDIA® graphics cards up to 28 TFLOPS in FP32
- Supports Intel® Xeon® E or 9th/ 8th-Gen Core™ i7/ i5 LGA1151 CPU
- Up to 128GB ECC/ non-ECC DDR4 2133 (4x SODIMM)
- Two x8, one x4, Gen3 PCIe slots for add-on cards
- Two hot-swappable 2.5" SATA HDD/ SSD with RAID 0/ 1 support
- 8~35V wide-range DC input with built-in ignition power control
- Patented thermal design for -25°C to 60°C rugged operation
- Patented damping brackets* to withstand 3 Grms vibration

Nuvo-8208GC is the first of its kind to offer such stellar CPU/ dual GPU tandem and computational power in an industrial-grade rugged compact design. Its rich I/O ports can be easily accessed and accepts a wide-range DC input (8~35V) making it easy to deploy and extremely flexible for all your critical industrial AI applications.

Intelligent video analytics

- Supports dual graphics cards to achieve advanced deep learning and run multiple training models simultaneously
- Provides additional PCIe slots for PoE cards
- AI and inference at the edge

Autonomous vehicle

- Brand new power delivery design to accept wide-range DC input and to handle heavy power requirements from dual 250W GPUs.
- Incorporates built-in ignition control, patented damping brackets and is compliant with MIL-STD-810G standard for in-vehicle deployment
- Provides GbE & USB3 ports with screw lock mechanism for securing cable connections

Nuvo-8240GC Series

Industrial-grade Edge AI Platform Supporting Dual NVIDIA® Tesla T4 and Intel® Xeon® E and 9th/ 8th-Gen Core™ Processor

- Supports dual NVIDIA® Tesla T4 GPU
- Supports Intel® Xeon® E or 9th/ 8th-Gen Core™ i7/ i5 LGA1151 CPU
- Up to 128GB ECC/ non-ECC DDR4 2133 (4x SODIMM)
- Two x8 (4-lanes), Gen3 PCIe slots for add-on cards
- 1x M.2 M key, 1x M.2 B key and 2x full-size mini-PCIe sockets
- 8~48V wide-range DC input with built-in ignition power control
- Proven thermal design for -25°C to 60°C rugged operation
- Patented damping brackets* to withstand 3 Grms vibration

Nuvo-8240GC is a rugged edge AI platform designed specifically to support dual NVIDIA® Tesla T4 for advanced inference acceleration applications. It features NVIDIA® multi-precision Turing Tensor Cores offering tremendous GPU power up to 130 TFLOPS in FP16 and 520 TOPS in INT4 for emerging GPU-accelerated edge computing and advanced AI inference. In addition, Nuvo-8240GC is powered by Intel® Xeon® E or 9th/ 8th-Gen Core™ CPU up to 8-core/ 16-thread coupled with workstation-grade Intel® C246 chipset to support up to 128GB ECC or non-ECC DDR4 memory.
